3 | Creating Reports

In this chapter, you will create a simple report. Reports are important documents often used in business and education to distribute information, communicate ideas, and share viewpoints and plans on a variety of topics. You will format your report using tabs, indents, margin changes, and headers and footers. You will also learn about research papers, a requirement for nearly every college student as well as professionally employed individuals. Your paper will include footnotes, citations, a bibliography, and a table of figures. Finally, you will explore Track Changes, a feature that allows for collaborative editing of a document.

LEARNING OBJECTIVES

▸ Work with columns and set margins

▸ Format text and apply styles

▸ Insert headers and footers

▸ Add footnotes and endnotes

▸ Insert citations and a bibliography

▸ Incorporate captions and a table of figures

▸ Insert comments and use Track Changes

📂 Project: Researching Social Media and Internet Commerce

My Virtual Campus is a social networking technology company. It sells web applications to colleges and universities. Your marketing manager, José Morales, has asked you to look into the latest trends in social media in schools. It is important to understand how the "always connected" generation is using technology in the pursuit of education. Your manager also wants you to download an online article regarding social media in education that he can distribute in the next staff meeting. And he wants you to make the article's dense text more readable by using heading styles, headers and footers, and white space.

You are also working on your masters in marketing, and your professor wants you to write a research paper about the origins and evolution of Internet commerce. You will use many sophisticated features, such as headers and footers, footnotes, citations, and bibliographies in creating this research paper.

Creating a Business Report

When writing a business report, you want it to be easy to read. Dense blocks of text are difficult to read, so break up your report with lists, headings/subheadings, and white space. Use a clear, easy-to-read font, such as Calibri (Word's default font), Arial, or Times New Roman. Here are some principles of communication you may want to keep in mind when writing a report:

▶ Plan before you write.

▶ Know your audience.

▶ Use active voice.

▶ Avoid wordiness.

▶ Use plain language; avoid overblown words.

▶ Don't use clichés.

▶ Use parallel structure.

▶ Edit out anything that doesn't add to your meaning.

▶ Organize your writing into short sections.

Setting Margins

Margins determine the amount of white space around the edges of the page. You can set margins for the entire document, a section, or selected text. The default margins in the Blank Document and Single Spaced (Blank) templates, as well as many others, are one inch all around. You can choose from a gallery of preset margins, or you can set your own custom margins.
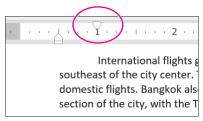

≡ Layout→Page Setup→Margins ▦

Indenting Text

Indents offset text from the margins. You can set indents by using the buttons on the Ribbon or by adjusting the indent markers on the ruler. The Increase and Decrease Indent buttons
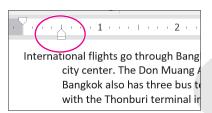

adjust the indent of an entire paragraph (or one or more selected paragraphs) and affect the left indent only. They adjust the indent based on the default tab stops, which are set at every half inch.

DEVELOP YOUR SKILLS: W3-D1

In this exercise, you will increase the margins in a report to provide a little more white space. You will use the Increase Indent button on the Ribbon to offset quotes in the report, and you will create your own custom indents using the indent markers on the ruler.

1. Open **W3-D1-SocMediaRpt** from your **Word Chapter 3** folder and save it as:
    `W3-D1-SocMediaRptRevised`
2. If necessary, choose **View→Show→Ruler**.

    Now you will increase the margin width to add more white space to the report.
3. Choose **Layout→Page Setup→Margins** ⊞ and notice the preset margin settings.

    You want a 1.5" left and right margin, and that is not available in the preset list, so you will customize your own settings.
4. Choose **Custom Margins** at the bottom of the menu.
5. On the Margins tab of the Page Setup dialog box, change the left and right margins to **1.5"** and then click **OK**.

Margins			
Top:	1"	Bottom:	1"
Left:	1.5"	Right:	1.5"

    Notice the gray margin areas at the ends of the ruler; they have increased to 1.5".
    Now you will use the Increase Indent button to offset quotes in the report.
6. Below *The Net Generation* heading, select the second and third paragraphs, which are inside quotation marks.

7. Choose **Home→Paragraph→Increase Indent** 📝.

The paragraphs indent from the left a half inch based on the default tab settings; however, you want to indent the paragraphs from both the right and the left. So, now you will use the indent markers on the ruler to complete the job.

8. Follow these steps to adjust the left and right indents:

Ⓐ Position the mouse pointer on the **Left Indent** marker (bottom rectangle) and drag to the **1"** mark.

Ⓑ Drag the **Right Indent** marker to the **4½"** mark.
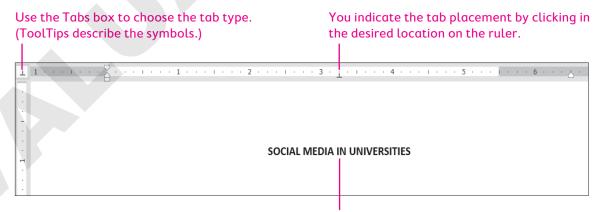

9. Save the report.

Setting Custom Tab Stops

Default tab stops are set every half inch, so the insertion point moves a half inch whenever you tap [Tab]. You can customize tab stops if you want other settings.

Warning! *Never use the [Spacebar] key to line up columns. Even if it looks right on the screen, it most likely will not print correctly.*

Using the Ruler to Set Custom Tabs

Word has four types of custom tab stops: left, right, center, and decimal. You can set all four types using the horizontal ruler. It is critical that you position the insertion point in the line where you plan to set tabs. Tab settings are carried inside the paragraph symbol to the next paragraph when you tap [Enter].
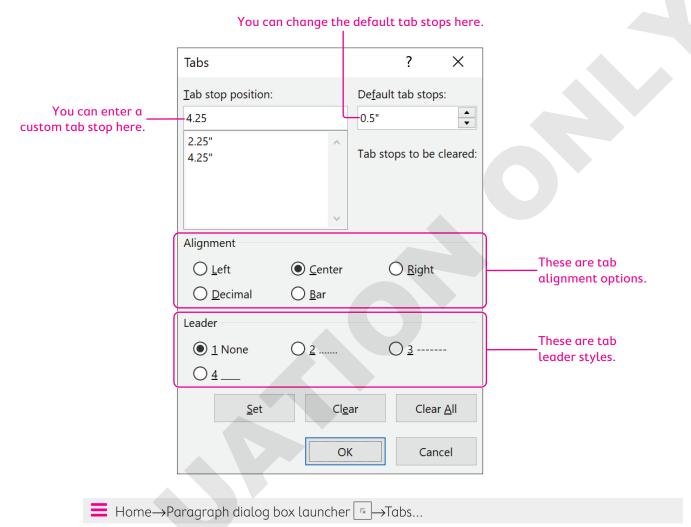

Use the Tabs box to choose the tab type. (ToolTips describe the symbols.)

You indicate the tab placement by clicking in the desired location on the ruler.

SOCIAL MEDIA IN UNIVERSITIES

This heading is centered by a center tab.

Tip! *You can delete a custom tab by dragging it off the ruler with your mouse. When you release the mouse button, the tab disappears.*

Using the Tabs Dialog Box to Set Custom Tabs

You can also set custom tab stops in the Tabs dialog box. You can specify precise positions for tabs, choose the type of tab (alignment), clear custom tab stops, and set dot leader tabs. A leader tab generates a row of dots when you tap Tab . You often see dot leaders in a table of contents separating a topic from its page number.

You can change the default tab stops here.

You can enter a custom tab stop here.

DEVELOP YOUR SKILLS: W3-D2

In this exercise, you will set custom tabs and create two tabbed tables.

1. Save your report as: **W3-D2-SocMediaRptRevised**
2. If necessary, display formatting marks.
3. Position the insertion point on the blank line below the section titled *Rapid Increase in the Use of Social Media.*

**4.** Follow these steps to set tabs for the first table:

A Verify that the Tabs box at the left of the ruler is set to a Left Tab. If not, click the box until it rotates around to Left Tab. (ToolTips describe the tab type.)

B Click the bottom edge of the ruler at the **2¼"** mark to set a tab.

C Click the ruler at the **4¼"** mark for the second tab.

D Type **Media** in the blank line and then type the next two entries, tapping ⎡Tab⎤ where you see the arrows and tapping ⎡Enter⎤ at the end of the line.

5. Type the rest of the table, tapping ⎡Tab⎤ and ⎡Enter⎤ where you see the arrows and paragraph symbols:

6. Select the first line of the table and choose **Home→Font→Bold** ⎡B⎤.

Now you will type the second table.

7. Position the insertion point on the first blank line below the last paragraph of the document.

Look at the ruler and notice that the tabs you set for the first table have disappeared. The tab settings for the first table are carried in the paragraph symbols for that table only.

8. Follow these steps to set the tabs for and type the second table:

A Set left tabs at the **2¼"** mark and the **3½"** mark.

B Type the table as shown, applying bold formatting to the first line of the table.

9. Save the file and close it.

Formatting Text and Using Styles

A style is one of the most powerful formatting tools. It is a *group of formats* enabling you to apply multiple formats to a block of text all at once. Styles are based on the current template's theme, which is a set of colors, fonts, and graphic effects. There are styles for document elements, such as headings, titles, and special character formats, providing consistent formatting throughout a document.

Spacing in Letters

The default line spacing in Word 2019 is 1.08 rather than the traditional 1.0 single spacing. It adds an extra 8% more space between lines than regular single spacing. It also adds 8 points of space after paragraphs. Therefore, rather than tapping Enter twice at the end of a paragraph, you just tap Enter once, and Word adds the extra spacing.

When you choose the Blank Document template on the Start screen or on the New screen in Backstage view, you are using the default spacing. Some documents, however, typically require single spacing, such as business letters, reports, and proposals. These methods are available for applying single spacing:

▶ Single Spaced (Blank) template

▶ Line and Paragraph Spacing button

Applying Traditional Spacing Using the Single Spaced (Blank) Template

Choosing the Single Spaced (Blank) template from the Start screen or from the New screen opens a single-spaced document. This is a good choice if the majority of your document will be single spaced. If you use single spacing in only part of your document, the Line and Paragraph Spacing button is a good choice.

Changing Spacing Using the Line and Paragraph Spacing Button

If you start a new document using 1.08 spacing and then decide to apply single spacing to a portion of the document, you can choose the 1.0 option in the Line and Paragraph Spacing button menu. You must select (highlight) the text to be single spaced or, at a minimum, position the insertion point in the paragraph before changing the spacing. If you wish to use other spacing such as double or triple spacing, the Line and Paragraph Spacing button is the place to go.

16. Choose **Home→Paragraph→Line and Paragraph Spacing** 📑 and choose **1.0**.

17. Save your letter.

Aligning Text Horizontally and Vertically

You can control how text aligns horizontally on the page using the paragraph alignment buttons in the Paragraph group on the Home tab. You can determine vertical alignment of text on a page using the Vertical Alignment feature in Page Setup.

13. Click the **Zoom In** button enough times to return to 100%.

14. Save and close the letter.

Types of Styles

There are many built-in styles, and you are always working within a style. There are two basic types of styles: character and paragraph. You can use the Styles gallery and Styles task pane to apply styles.

▸ Character styles: Character styles are applied to the word the insertion point is in or a selected group of words. Character styles contain only character formats, not paragraph formats. You can apply character styles *within* a paragraph that is formatted with a paragraph style.

▸ Paragraph styles: Paragraph styles are applied to all text in selected paragraphs or to the paragraph containing the insertion point. You can use any character or paragraph format in a paragraph style. For example, you may want to format a heading with a large, bold font (character formatting) and apply paragraph spacing before and after the heading (paragraph formatting).

Collapsing Heading Topics

When you apply a heading style and the insertion point is in the heading, a small triangle marker appears at the left (whether formatting marks are displayed or not). You can click the marker to collapse and expand the text below it. In the following illustration, the text below *The Net Generation* is collapsed, allowing you to focus on certain parts of a document.

DEVELOP YOUR SKILLS: W3-D5

In this exercise, you will use Live Preview in the Styles gallery to find styles that will give your report a professional, polished look. You will apply the Title style to the report's main heading and the Heading 1 style to the headings within the report.

1. Open **W3-D5-SocMediaRpt** from your **Word Chapter 3** folder and save it as:

2. Click anywhere in the report's main heading, **SOCIAL MEDIA IN UNIVERSITIES**, at the top of page 1.
3. Choose the **Home→Styles→More** button to open the Styles gallery.

4. Hover the mouse pointer over the Title style to see its effect on the heading and then click to apply the style.

   Now you'll open the Styles task pane. It includes all the styles that are in the Styles gallery.
5. Click the **dialog box launcher** in the bottom-right corner of the Styles group.

   Next you'll apply the Heading 1 style to the headings in the body of the report.
6. Position the insertion point in **The Net Generation** heading and then click the **Heading 1** style in the task pane to apply that style to the heading.
7. Use the same technique to apply the Heading 1 style to the remaining headings: **Rapid Increase in the Use of Social Media** and **University Recruiting Through Social Networking**.
8. Close the Styles task pane.

   Now you will collapse and expand the text below The Net Generation heading.
9. Scroll up and position the insertion point in **The Net Generation** heading to display the triangle marker to the left of the heading.
10. Click the **marker** to collapse the text below the heading.

    Collapsing parts of a document allows you to focus on the remaining parts.
11. Click the **marker** again to expand the text.
12. Save the report.

# Inserting Headers/Footers, Comments, and Page Breaks

Headers and footers appear at the top and bottom of every page in a document, respectively, above and below the margins. You can place text, page numbers, dates, and other items in the header and footer areas. When you enter information in these areas, it is repeated on every page of the document. There is a variety of built-in header and footer formatting styles, or you can create your own.

The Comment feature is a great collaboration tool. It allows reviewers and originators to communicate about a document by posting comments to each other.

Clicking the reply button in the comments balloon allows threaded conversations between the originator and reviewers.

At times, you may wish to break up portions of your document by adding a page break. For example, you may want a report conclusion, appendix, or bibliography to each appear on separate pages. Word allows you to enter these page breaks with a simple Ribbon command, or by tapping Ctrl + Enter .

≡ Insert→Header & Footer→Header ☐ *or* Footer ☐ *or* Page Number ☐

≡ Insert→Comments→Comment ☐

≡ Layout→Page Setup→Breaks→Page ☐

DEVELOP YOUR SKILLS: W3-D6

In this exercise, you will add headers and page numbers to the report using the built-in formats. Then you will insert a page break and add a comment to your report.

1. Save your file as: **W3-D6-SocMediaRptRevised**
2. Choose **Insert→Header & Footer→Header** ☐ and choose the **Sideline** format from the gallery.
3. Click **Document Title** and type **My Virtual Campus** in its place.
4. Double-click in the document to close the header.
5. Choose **Insert→Header & Footer→Page Number** ☐ and select **Bottom of Page**.
6. Scroll down in the gallery and choose **Large Color 3**.
7. Double-click in the document to close the page number footer.

   You can open the header/footer area by double-clicking anywhere in either the header or footer area.

8. Double-click the footer area to open it and then double-click in the document again to close it.
9. Scroll through the report and observe the headers and page numbers.

   It would look better to have at least two lines of the first table at the top of the second page.

10. Position the insertion point in front of *Instagram* in the first table and press Ctrl + Enter to insert a page break.

Add a Comment

Now you will add a comment for your marketing manager. He will see it when he reads your report.

11. Scroll to the top of the document and select the word **Universities** (the anchor point for the comment) in the title.

**12.** Choose **Insert→Comments→Comment** and type the following in the comment balloon on the right:

`Jose, please let me know if you need additional information regarding social media in education.`

13. Save and then close the report.

Arranging Text in Multiple Columns

You can use newspaper-style columns (also known as newsletter-style columns) to arrange text in multiple columns. In newspaper layout, text flows down one column and wraps to the top of the next column, as in a newspaper or magazine. Newspaper columns can enhance readability, as the eye doesn't have to travel far across the page before reading the next line, and they break up dense text with random gaps. Columns are automatically reformatted as you add or delete text during editing cycles.

You can quickly set your text in columns with the Columns button on the Ribbon, or you can open the Columns dialog box where you can set up more sophisticated column layouts. For example, you can insert a line between columns and specify the width of each column.

These are commonly used column styles.

Column Breaks and Section Breaks

You can manually force a column to end by inserting a column break, thus moving the text at the break point to the top of the next column. This technique is often used to place headings at the top of columns and to balance columns on the last page of a multicolumn document.

Whenever you make a document-level formatting change that doesn't apply to the entire document, you need one or more section breaks to define the portion of the document affected by the change. For example, in a columnar magazine article, you may see a title line that extends across the page and then the body of the article is formatted in two columns. You need a section break to separate the one-column title from the two-column body of the article.

TYPES OF SECTION BREAKS

Section Break	Purpose
Next Page	Inserts a section break and starts the new section on the next page
Continuous	Inserts a section break and starts the new section on the same page
Odd Page	Inserts a section break and starts the new section on the next odd-numbered page; a blank page may be inserted to force the odd-page section break
Even Page	Inserts a section break and starts the new section on the next even-numbered page; a blank page may be inserted to force the even-page section break

The following illustration shows the use of continuous section breaks that are sectioning off the two-column portion of a document:

The section above this break has one-column formatting, and the section below it has two-column formatting.

Arranging Text in Multiple Columns **87**

DEVELOP YOUR SKILLS: W3-D7

Because the article your marketing manager wants to distribute at the next staff meeting consists of dense text, he wants you to set the article in newspaper columns to enhance readability. In this exercise, you will insert a section break after the introduction, and then you will lay out the second section of the document in two columns.

1. Open **W3-D7-SocMedForStaff** from your **Word Chapter 3** folder and save it as: **W3-D7-SocMedForStaffRevised**

2. If necessary, display the formatting marks.

   You want the introductory paragraph to span the page, so you will insert a section break before the social media article and then set the rest of the article in columns.

3. Position the insertion point in the second blank line following the first paragraph.

4. Choose **Layout→Page Setup→Breaks** →**Continuous**.

   This starts a new section on the same page.

5. Delete the blank line at the top of the second section.

6. Position the insertion point in the second section.

7. Choose **Layout→Page Setup→Columns** →**Two**.

8. Scroll to page 2, and you'll see that the columns are not well-balanced.

9. Position the insertion point at the beginning of the last paragraph in the left column beginning with *In the real world*.

10. Choose **Layout→Page Setup→Breaks** →**Column**.

11. Save and close the file.

Writing a Research Paper

There are a number of documentation styles for research papers, each with its own specific formatting requirements. For example, IEEE standards are used for research in computers and electronics; APA is used in psychology research; Turabian style is used for research in literature, history, and the arts; and MLA is primarily used for research in the humanities.

The Modern Language Association publishes the *MLA Handbook for Writers of Research Papers*. The MLA style has specific formatting requirements, *some* of which are already defaults within Word. For example, the default margins of one inch comply with the MLA requirement. However, Word does not comply with *all* MLA guidelines by default.

Warning! *This chapter does not presume to be a resource for MLA guidelines. Refer to the MLA handbook or the MLA website (mla.org) for guidance in complying with MLA requirements.*

Working with Footnotes, Endnotes, and Citations

Footnotes, endnotes, and citations are important elements of most research papers. You use them to comment on, or cite a reference to, a designated part of the text. Footnotes appear at the bottom of pages on which they are inserted; endnotes, as the name implies, appear at the end of a document or section; and citations appear on a separate Works Cited page at the end of the document. Works

Cited is another name for a bibliography. You can enter the source information when you create the citation or insert a placeholder and add the source data later. To help you enter the information correctly, example text appears for each of the various fields in the Create Source dialog box.

4. Position the insertion point to the right of the period at the end of the first paragraph.

5. Choose **References→Footnotes→Insert Footnote** AB¹.

The footnote reference mark appears at the insertion point, and a corresponding footnote appears at the bottom of the page.

The commercial potential of the Internet stems from the fact that it is a global network with inexpensive access.² The Internet is also available 24x7. The multimedia capability to the Internet is important for marketing and advertising. Quick product delivery, automated order-taking, and low overhead are several more factors that are driving Internet commerce.³

Now you will convert your footnotes to endnotes.

8. Choose **References→Footnotes dialog box launcher** ▣ and click **Convert**.

Working with Bibliographies

A bibliography is a list of the sources cited in the preparation of a document. Bibliographies are automatically generated based on the source information that you provide in the Create Source dialog

box. The bibliography picks up the correct punctuation; however, certain formatting requirements are not defaults and must be addressed separately.

Tip! *The bibliography options may not format references as needed. Use the Insert Bibliography command to create citations more precisely.*

You can edit captions after you place them by making the changes directly in the caption and then updating the table of figures to reflect the edits. Bibliographies and tables of figures do not update automatically when changes are made to the citation or caption entries. To update these fields, simply right-click inside the field and choose Update Field.

Using Track Changes

The Track Changes feature is a useful tool when working with team members to collaborate on a report or other documents. You can electronically distribute copies to different members, and, with Track Changes, the changes they make are marked. You can merge the changes from all copies into a single document, and then you can review each change and accept or reject it.

Turn Track Changes on or off.

Choose how you want changes to appear in the document.

Choose the types of revisions you want to see, such as formatting and insertions and deletions.

View all changes in a list.

Reviewing Tracked Changes

It's easy to find and review changes to a document. When you review changes, you can jump from one change to the next, giving you the opportunity to accept or reject each change in order. You can also accept or reject all changes at once. After you accept or reject a change, the revision marks are removed.

This button accepts the currently selected change.

This button rejects the currently selected change.

These buttons navigate to the next or previous tracked change.

These options appear when you click the Accept menu button ▼. Similar choices are available on the Reject button.

The Mansion of Happiness

The earliest board games published in the United States were based upon Christian morality. The Mansion of Happiness (1843), for example, sent players along a path of virtues and vices that led to the Mansion of Happiness. The Game of Pope and Pagan, or The Siege of the Stronghold of Satan by the Christian Army (1844) pitted an image on its board of a Hindu woman committing suttee against missionaries landing on a foreign shore. The missionaries are cast in white as "the symbol of innocence, temperance, and hope" while the pope and pagan are cast in black, the color of "gloom of error, and ... grief at the daily loss of empire".

American Protestants believed a virtuous life led to success, but the belief was challenged mid-century when the country embraced materialism and capitalism. In 1860, The Checkered Game of Life rewarded players for mundane activities such as attending college, marrying, and getting rich. Daily life rather than eternal life became the focus of board games. The game was the first to focus on secular virtues rather than religious virtues and sold 40,000 copies its first year.

W3-E1　That's the Way I See It

You are an intern working in the corporate offices of a major grocery store chain. Your manager has asked you to research the pros and cons of reusable shopping bags compared to plastic bags. Start a new document and name it: **W3-E1-ShopBags**

Type a creative title and an original introductory paragraph for the paper and include two footnote comments in the paragraph. Using an Internet search, find two sources who favor reusable shopping bags and two sources who do not. Pull information from these sources and compare the two sides of the issue using a two-column tabular table listing the pros and cons. Insert citations at the end of each source and generate a bibliography from the citations. Add a page number in the footer area. Insert two pictures you find on the Internet representing reusable bags and plastic bags. Add captions to the pictures and create a table of figures. Use styles and indenting, and widen the left and right margins to make your report more readable. Save the file.

W3-E2　Be Your Own Boss

As the owner of Blue Jean Landscaping, you plan to hold a rose-pruning seminar for your customers. Research pruning techniques and create a report of your research results to hand out to customers at the event. Start a new document and name it: **W3-E2-RoseSeminar**

Type a creative title and an original introductory paragraph and include a footnote comment in the paragraph. Cite three different sources in your report and generate a double-spaced bibliography of your citations. Insert a header that includes your company name. Use styles and indents, and increase the margin width to add to the paper's readability. Set the body of the report in a two-column format and insert a column break, if necessary, to balance the columns. Include a comment at the top of the document asking your partner to review the document and make any suggestions she likes. Save the file.

W3-E3　Demonstrate Proficiency

The owner of Stormy BBQ is proud to serve free-range beef. He wants his employees to understand the benefits of using natural, grass-fed beef so they can discuss the idea with customers. He has asked you to prepare a report that he can distribute to all employees. Start a new document and name it: **W3-E3-GrassFed**

Conduct online research on the benefits of using free-range, natural beef. Type a creative title and center it horizontally. Type an original introductory paragraph that includes two commentary footnotes. Cite three sources who favor free-range beef. Generate a bibliography for the citations. Use indents and styles, and adjust the margins to make your paper more readable. Add a footer that includes the company name and page numbers.

Insert **W3-E3-Cattle** as a Text from File object into your report. Insert creative captions for the pictures and generate a table of figures. Create a two-column tabular table listing the disadvantages of feedlot cattle (fossil fuel–intensive, for example) versus the advantages of grass-fed cattle (higher in omega-3 fatty acids, for example). Include at least five rows in the table. Insert a comment at the top of the document asking your admin to look it over for spelling and grammar errors. Save the file.
