

# Table of Contents

## LESSON 1: DESIGNING A RELATIONAL DATABASE 2

Designing a Relational Database—An Overview	3
Principles for Good Database Design	3
Planning a Relational Database	3
Normalizing Data	5
Examining and Editing Database Objects	6
Modifying Table Field Settings	6
Storing Your Exercise Files	9
Testing Control Settings	11
Creating Lookup Fields	12
Creating a Split Form	15
Working with Relationships	16
Identifying Relationship Types	16
Creating and Modifying Relationships	18
Editing Relationships	21
Reviewing Effects of Relationships on Datasheets	23
Reviewing Relationship Join Properties	23
Setting Join Properties	23
Identifying Join Types	24
Defining Left and Right Joins	24
Identifying Object Dependencies	26
Concepts Review	27

## LESSON 2: CREATING COMPLEX QUERIES 28

Identifying Advanced Query Features—An Overview	29
Querying Tables Containing No Relationships	29
Creating Select Queries	30
Creating a Multi-Table Report Based on a Query	31
Creating and Running Parameter Queries	32
Setting Up a Parameter Query	32
Formatting the Criteria Expression	33
Creating Complex Parameter Prompts	33
Creating a Calculated Field in a Query	34
Creating and Formatting a Calculated Field	34
Identifying Features of a Calculated Field	35
Using a Function in a Query Expression	35
Adding Totals to Datasheets	39
Creating Special Types of Queries	40
Creating a Crosstab Query	40
Creating Unmatched and Duplicates Queries	43

Creating and Running Action Queries	45
Identifying Action Query Types	45
Identifying Queries by Their Icons	45
Enabling Content	45
Creating an Append Action Query	45
Creating an Update Query	48
Creating a Delete Query	49
Creating a Make Table Query	50
Concepts Review	51

## LESSON 3: CUSTOMIZING INPUT FORMS 52

Customizing Form Design	53
Examining Form Design View	53
Identifying Layout View Elements	54
Creating Forms	55
Identifying a Record Source	55
Working with Form Controls	56
Modifying Form Controls	59
Editing Labels	59
Deleting Controls	59
Using Design Font Tools	60
Applying Conditional Formatting	60
Using the Property Sheet	61
Using the Fill Color Palette	62
Arranging Controls	64
Modifying Form Layout	66
Displaying Form Header and Form Footer	66
Formatting Form Section Background	66
Adding Design Elements to Forms	67
Setting Additional Form Properties	70
Setting a Form Tab Order	71
Concepts Review	73

<b>LESSON 4: CREATING CUSTOM REPORTS</b>	<b>74</b>
Using Report Design View	75
Identifying Report Design View Elements	75
Displaying Report Views	76
Creating a Report in Design View	77
Working with Report Controls	77
Modifying a Report in Design View	80
Adding Report Sorting and Grouping Levels	80
Adding Date and Time Data to a Report	83
Adding Graphics to Reports	84
Applying Themes	85
Formatting Controls	85
Adding a Title to the Report Header	87
Using the Property Sheet	87
Performing Report Calculations	88
Using the Expression Builder	88
Creating Controls to Calculate Totals	91
Creating Labels Using the Label Wizard	92
Setting Up the Labels	92
Adding Fields to the Labels	92
Printing Reports	94
Setting Report Print Layout	94
Controlling Page Breaks	94
Concepts Review	95
<i>Index</i>	96
