<b>LESSON 1: SETTING UP COMPLEX FORMS</b>	<b>2</b>	<b>LESSON 3: CUSTOMIZING THE DATABASE INTERFACE</b>	<b>32</b>
Identifying Complex Form Features	3	Setting Access Options	33
Creating a Main Form Containing a Subform	3	Displaying Access Options	33
Removing the Layout	3	Enabling Error Checking	34
Connecting Related Tables in Forms	4	Customizing the Navigation Pane	35
Creating a Form with Subform	4	Setting Database Properties	38
Storing Your Exercise Files	5	Setting Up Current Database Format	39
Editing a Data Source	7	Setting Datasheet Colors and Default Font	40
Formatting a Form	10	Customizing the Database Interface	42
Adding a Calculated Control to a Form	13	Splitting a Database	42
Totaling Calculated Fields	13	Creating a Database Switchboard	43
Positioning Calculated Controls in Form Sections	13	Adding Items to a Switchboard	45
Applying Totals to Datasheets	13	Adding Custom Command Buttons to a Switchboard	47
Using the Expression Builder	14	Creating a Navigation Form	48
Adding the Current Date to the Form	15	Locating Navigation Form Layouts	49
Concepts Review	16	Setting Startup Options to Open a Form	51
<b>LESSON 2: CREATING COMPLEX REPORTS</b>	<b>18</b>	Concepts Review	52
Importing a Report into a Database	19	<b>LESSON 4: INTEGRATING ACCESS WITH OTHER APPLICATIONS</b>	<b>54</b>
Identifying Report Record Sources	19	Converting Access 2010 Databases to Other Access Formats	55
Using SmartTags	19	Identifying the Format of an Access Database	55
Adding a Subreport to a Main Report	21	Attaching Files to Database Records	56
Examining the iJams Database Objects	21	Using the Attachment Data Type	56
Identifying Procedures for Adding a Subreport	21	Integrating Access with Word	58
Creating a Report from a Subreport	22	Merging Access Data with Word Documents	58
Numbering Items in a Report	23	Publishing Data to Word	60
Setting Properties to Number Items	23	Copying Data from Access to Word	60
Numbering Subreports Separately	24	Integrating Access with Excel	62
Creating Calculated Controls on a Subreport	26	Importing Data from Excel Files	62
Positioning Calculated Controls	26	Exporting Access Data to Excel	63
Growing a Subreport	27	Linking an Excel Worksheet to an Access Database	64
Setting Page Breaks and Customizing Controls	29	Fixing Broken Links	65
Positioning the Page Break Control	29	Concepts Review	66
Concepts Review	30	<i>Index</i>	68
