Working with Customers

Learning Objectives

- Set up customers and sub-customers
- Import customers
- Edit sales settings and preferences
- Create sales receipts and invoices
- Receive payments from customers
- Record bank deposits
- Create sales reports
- Create bank rules

The Sales & Get Paid App

- Links to information about customers/clients and their transactions
- Perform customer-/client- related tasks, such as searching for customer/clients and adding and importing lists of customers/clients and products/services
- Ten tabs: Overview, Sales Transactions, Invoices, Payment Links, Recurring Payments, Sales Orders, Sales Channels, QuickBooks Payouts, Channel Payouts, and Products & Services
- Customer Hub provides overview of all customer/client or lead activity

The Sales & Get Paid App (cont.)

- You can add customers and sub-customers.
 - The customer's display name is the only requirement.
- Import customers using the Import Data tool or from within the Customer Hub.
 - Excel worksheets
 - CSV worksheets
 - Google Sheets
- You can edit, merge, and inactivate customers.
 - You can't, however, delete!
- NEW! You can now assign customers to customer types.
 - This allows you to sort customer and sales reports by the customer type (for example, "Retail," "New," or "Referral").

Recording Sales Transactions

- Two ways:
 - Cash - sales receipt at the time of purchase
 - Accounts Receivable - invoice billed after the sale
- You can customize your Sales forms (receipts, estimates, invoices, etc.). 
- Customizable forms can include:
 - Company logo
 - Contact info
 - URL

Recording Sales Transactions (cont.)

- Transaction forms can automatically create accounting transactions.
- The Undeposited Funds account holds funds waiting to be deposited.
- Price rules can be added to all or only specific customers, and to all or to only specific products.

TIP! *Your forms may appear differently from what is displayed and discussed here.*

Receiving Customer Payments

- When customers pay open invoices, funds are applied to the corresponding invoice.
- Open invoices display in the lower section of the window.

Correcting Errors

- It's easy to fix errors in QBO, but be careful of dates and transaction numbers.
- Voiding maintains the transaction in reports but changes the values to zero.
- Deleting removes the transaction from all reports (except the audit log).
