

# Microsoft Excel 2010: Introductory Skills

By Sandra Rittman

## Preliminary Table of Contents

### Lesson 1: Exploring Excel 2010

#### Presenting Excel 2010

#### Starting Excel

#### Exploring the Excel Program Window

Using Worksheets and Workbooks

Mousing Around in Excel

Scrolling Along in a Worksheet

Navigating in a Worksheet

#### Working with Tabs and Ribbons

The Office Button

The Quick Access Toolbar

Displaying Tabs and Working with Ribbons

Hiding the Ribbon

#### Entering Data in Excel

Data Types

Completing Cell Entries

The Enter and Cancel Buttons

Deleting and Replacing Entries

Long Text Entries

#### Working with Numbers

Number Formats

Decimals and Negative Numbers

#### Understanding Save Concepts

The Save Command

Save As Options

Locating Workbooks

Issuing Commands from the Keyboard

#### Closing and Starting New Workbooks

#### Exiting from Excel

### Lesson 2: Editing, Viewing, and Printing Worksheets

#### Opening Workbooks

#### Editing Entries

Replacing Entries

Deleting Characters

#### Selecting Cells and Ranges

Excel Ranges

#### Working with Cut, Copy, and Paste

Marquee and Paste Options Button

The Office Clipboard

Moving and Copying Cells via Drag and Drop

Editing Cells via Right-Dragging

#### Using Undo and Redo

Undoing Multiple Actions

#### Clearing Cells Contents and Formats

#### Using Auto Features

Working with AutoFill

AutoComplete vs. AutoFill

Auto Fill Options

#### Exploring the Many Views of Excel

Working in Page Layout View

Zooming the View

#### Printing Worksheets

Print Preview

Print the Worksheet

Printing Selections

#### Editing Workbook Properties

Standard Properties

Advanced Properties

**Lesson 3: Working with Formulas and Functions**

**Working with Formulas and Functions**

Using AutoSum to Create a SUM Formula  
Status Bar Functions and Customization

**Creating Formulas**

Beginning Character in Formulas

Cell Range References

The Language of Excel Formulas

“Please Excuse My Dear Aunt Sally”

**Using Cell References in Formulas**

Relative Cell References

Point Mode

Absolute Cell References

Mixed References

Using the F4 Function Key

What-If Analysis

**Modifying and Copying Formulas**

Modifying Formulas

Copying Formulas

**Displaying and Printing Formulas**

**Using Formula AutoComplete**

Functions Defined

**Using Insert Function**

**Creating Formulas with the IF Function**

IF Function Syntax

How the IF Function Works

**Lesson 4: Formatting the Contents of Cells**

**Formatting Worksheets**

Formatting Entries with the Ribbon

Using the Mini Toolbar

Live Preview

**Using Excel’s Alignment and Indent Features**

Aligning Entries

Indenting Cell Entries

**Using Excel’s Text Control Options**

Merging and Splitting Cells

Wrapping Text

Shrinking Text to Fit Within a Cell

**Formatting Numbers**

Using the Number Command Group

Using Accounting and Currency Styles

Applying the Percent Style

How Numbers Display in Cells

Adjusting Decimal Places

Displaying Negative Numbers

**Using the Format Cells Dialog Box**

**Applying Borders and Fills to Cells**

Applying Borders

Applying Fill Colors and Patterns

**Working with Format Painter and Quick Styles**

The Format Painter Tool

Applying Quick Styles to Cells

**Formatting with Themes**

**Inserting Date Functions and Formatting**

Working with Dates

Date Serial Numbers

Entering Dates

Inserting Date and Time Functions

**Creating Custom Formats**

**Working with Conditional Formatting**

Using Presets and Multiple Conditions

Creating a Conditional Formatting Rule

Formatting with Graphics

The Conditional Formatting Rules Manager

**Lesson 5: Changing the Appearance of Worksheets**

**Managing Worksheets**

Inserting and Deleting Worksheets  
Rearranging, Copying, Renaming, and Coloring  
Worksheet Tabs

Hiding and Unhiding Worksheets

**Modifying Columns and Rows**

Column Widths and Row Heights  
Standard Column Widths and Row Heights  
AutoFit

**Inserting and Deleting Columns, Rows, and Cells**

Inserting and Deleting Rows and Columns  
Inserting and Deleting Cells

**Hiding Columns and Rows**

Formatting All Cells in a Column or Row  
Simultaneously

Hiding Columns and Rows

Unhiding Columns and Rows

**Changing Vertical Alignment and Rotating Text**

Setting Vertical Alignment

Rotating Text

**Using Excel's Find and Replace Commands**

Replacing Cell Formats

**Using AutoCorrect**

Expanding AutoCorrect Entries

Undoing AutoCorrect Entries

Creating and Editing AutoCorrect Entries

**Lesson 6: Charting and Transmitting Worksheet Data**

**Creating Charts in Excel**

Integrated Chart Engine

Creating New Charts

Choosing the Proper Data Source

Chart Types

Column Charts and Bar Charts

Category Axis and Value Axis

Chart and Axis Titles

The Chart Tools

**Moving and Sizing Embedded Charts**

Moving Embedded Charts

Sizing Embedded Charts

Deleting Charts

**Exploring Other Chart Types**

Line Charts

Pie Charts

**Modifying Existing Charts**

Changing the Chart Type

Reselecting Data

Modifying Chart Elements

Formatting Chart Elements

**Applying Layouts and Styles to Charts**

Formatting Attributes Controlled by the Selected  
Style

Viewing All Available Layouts and Styles for a  
Chart Type

**Previewing and Printing Charts**

**Emailing a Workbook**

Attaching a Workbook

Inserting a Worksheet in an Email Message

**Importing Data into Excel via a Web Query**

**Lesson 7: Working with Large Worksheets:**

**Sorting Worksheet Data**

Sorting by a Single Column

Sorting Selected Rows

Sorting by Multiple Columns

**Using Flexible Worksheet Views**

Freezing Rows or Columns

Splitting the Worksheet Window

Viewing Worksheets in Multiple Windows

**Printing Multipage Worksheets**

Setting Print Format in Page Layout View

Page Layout Ribbon

Applying a Worksheet Background

Sizing Options

Headers and Footers

Adding a Watermark Image

Applying a Worksheet Background

Setting Title Rows and Columns

Sheet Options

Working with Page Breaks

**Lesson 8: Managing Multiple-Sheet Workbooks**

**Using Multiple Worksheets**

Modifying the Default Number of Sheets

Selecting Multiple Sheets

**Linking Cells and Formulas**

Why Link Cells?

Linking Formulas

**Copying Worksheets**

The Move or Copy Dialog Box

Copying Formats between Worksheets

**Naming Cells and Ranges**

Naming Rules

Creating Defined Names

Using Defined Names

Modifying and Deleting Defined Names

**Creating Hyperlinks**

Types of Hyperlinks

Insert Hyperlink Dialog Box

Editing and Removing Hyperlinks

**Printing Multiple-Sheet Workbooks**

Applying Page Setup Options to Multiple Sheets

Printing All Sheets in a Workbook

Printing Selected Sheets

**Glossary**

**Index**
